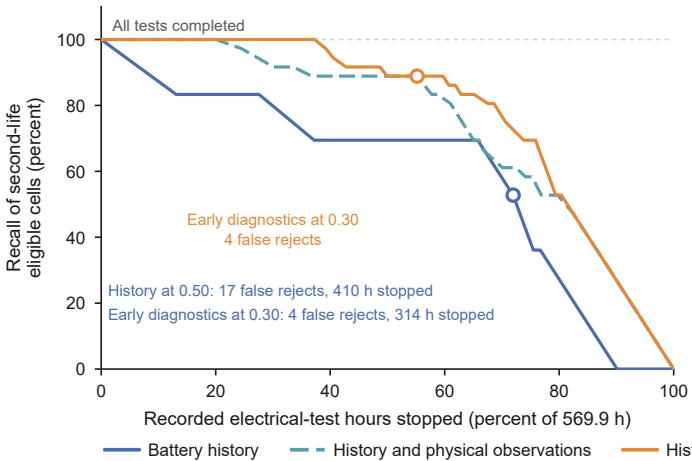
a

Screening resource and risk frontier



Operational reading of two thresholds

Quantity	History at 0.50	Early diag. at 0.30
Tests stopped	71	54
Stopped hours	410.1	314.5
Stopped hours, percent	72.0	55.2
Cells retained	29	46
False rejects	17	4
False accepts	10	14

Hours describe the recorded electrical channel time attached to stopped cells before any acquisition or verification burden.
